Jikoshokai

Slide 1

Konnichiwa. Kyou wa **Ferrum to iu Ruby no (tool)** ni tsuite hanashimasu.

Ferrum wa headless browser driver desu.

(screenshot) wo tottari, **PDF wo tsukuttari (make)**, **JavaScript ga ooi pēji (pages)** wo **test** dekimasu.

Slide 2

Soredewa, ima kara **Ferrum ga nani wo suru no ka** demo wo okonaimasu(we will do).

Mazu, **hidari gawa (left side)** wo mite kudasai. Kore wa **(browser)** de load sareta website de, **(dashboard)** ga hyōji sareteimasu (displaying).

Soshite, kono website ni **Ferrum no gem wo tsukau (use)** to, **PDF ga seisei (generated)** saremashita.

Migi gawa (right side) ni sono PDF ga hyōji sareteite(displaying), goran no tōri(as shown), **browser to mattaku onaji (exactly the same)** ni mieru n desu.

Sugoku nai desu ka? Watashi wa sō omoi masu!

Slide 3

Ferrum no **katsuyou rei** (usage examples) ni tsuite hanashimasu.

- Heroku de no haibi (deployment) desu.
Ferrum wa PDF **sakusei** (generation) ya screenshot toru koto ni tsukawaremasu.
Gai-bu saabisu (external services) nashi de ugokimasu.
- Saigo ni, Web **jidouka** (automation) to scrapping desu.
Ruby community de ninki (popular) desu.
Suterusu kinou (stealth function) ga ari, **botto kentou** (bot detection) wo **kaihi** (avoid) dekimasu.
Headerless browser no **sousa** (operation) ni pittari (perfect) desu.

Slide 4

Ferrum no merit o mite mimashō.

1) Ferrum wa **junsui (pure)** na Ruby desu.

Java ya Node.js wa hitsuyō arimasen.

2) Chrome DevTools Protocol o tsukatte, honmono(exactly same) no browser no yō ni hyōji shimasu.

3)**Seikaku(Acurate)** na screenshot ya PDF ga tsukuremasu.

4)Capybara to yoku **renkei**(integrate) dekimasu.

API wa kantan de, hajimete no hito ni mo wakariyasui desu.

Slide 5

Tsugi ni, Ferrum no **kadai**(demerit) desu.

1) Chrome ya Chromium ga hitsuyō nanode, settei(configuration) ga sukoshi taihen desu.

2) Prawn nado no karui tool yori resource o ōku tsukaimasu.

3) Seiteki(static) HTML de wa hyōji ga osoi desu.

layout no jiyū ga sukunai desu.

headerless mode de wa, bug no chōsa(finding) ya shūsei(fix) ga muzukashii desu.

Slide 6

Tsukau toki:

1) JavaScript ga takusan tsukawarete iru page o test shitari, insatsu (print) shitai toki

2) Honmono (exactly) no mitame ga hoshii toki

Sakeru toki:

- 1) Karui PDF ya tekisuto chūshin(**Text-centered**) no PDF ga hoshii toki
- 2) Reiauto no komakai (complex) seigyo (control) ga hitsuyō na toki

Slide 7

Matomeru to,

- **Browser saigen** (reproduce)
Ferrum wa **browser** no **mitame** (appearance) o tadashiku **saigen** (reproduce) shimasu.
Web page ga sono mama mieru node, tesuto ya PDF **sakusei** (creation) ni benri desu.
- **Ruby kaihatsu**
Ruby de kaihatsu suru hito ni **muiteimasu** (suitable). Ruby no **kōdo** (code) kara kantan ni buraunza **sōsa** (operation) ga dekimasu.
- **Chūiten (Disclaimer)**
Demo, **sokudo** (speed) ya reiauto (layout) no **komakai** (detailed) **seigyo** (control) ni wa muiteimasen(not suitable) . Ugoki ga **osokunattari** (become slow), komakai **chōsei** (adjustment) ga **muzukashii** (difficult) koto ga arimasu.
- **Sentakushi** (Choices)
Dakara, **mokuteki** (purpose) ni awasete hoka no tsūru mo **kentō** (consideration) shimashou. **Hayasa** (speed) ga daiji nara, motto karui tool ga ii desu.

Slide 8

Ruby ni tsuite no happyo wa totemo mijikakatta desu.

Kuwashiku(details) hanasemasen deshita.

Watashitachi wa Ruby on Rails no workshop o yoku shiteimasu.

Kyōmi (Intersect) ga areba zehi sankā shite kudasai.

Shitsumon ga areba kite kudasai
